Name: Kurt Kleemann
Submission Topic: Electorate Boundaries
Electoral District: Hill

Submission:

The proposed boundary changes for Hill are grossly unfair to all constituents due to the enormous size of the proposed new area of Flinders. The towns and regions in the proposed Flinders area have little in common with each other and any person representing the proposed seat of Flinders would have an almost impossible task of covering the huge area that is being proposed. It is ridiculous that anyone with an ounce of common sense and integrity would suggest that the people in the area of the proposed Flinders boundary could be properly represented by one member of parliament due to the sheer size of the area this person would represent. Just look at the size of the Flinders area and genuinely ask yourself how would a person get around to all the communities in this electorate let alone understand community needs and concerns in so many towns with such diverse problems and issues. Any reasonable person would agree that the proposed changes to the seat of Hill are unreasonable and unjust to the constituents of Hill and should not go ahead.
