I would like to put forward that the North Burnett either be reduced in size, or better managed (shouldn't need offices in each town with staff etc if all main operations are done in Gayndah. It's a miss management of resources and funds). The residents are not been looked after due to the size of the electric and our infrastructure is failing. Our roads are dangerous and any maintenance is a bandaid - there is no accountability. we are a shire of retirees, disability or low income households. Our jobs are limited and along with our resources (doctors, no dentists, specialists and education). we need better care and consideration from our governments.
