The proposed changes appear highly unnecessary and appear to group regions that do not share the same economic or environmental factors such as dry land with tropic land or coastal land.

From a political standpoint and given the timing, it appears that this action is blatant gerrymandering in favour of supporting the Liberal Party. This will lead to an erosion of people's political rights to equal representation and have economic impact to smaller communities that are no longer able to be represented due to the enlargement or change of their electoral district.

I completely oppose the suggested electoral district changes.
