**Submission:**

Dear Sir madam

In regards to the electroial boundary possible redistribution / change and being a resident of Coolum (for a fair while now) may i suggest the following - and being practical.

1. Use the maroochydore river as a northern boundary
  1. Thus Reducing Marcchoydore to the north but extending to the west
  2. Thus reducing Ninary to the south But extending maroocydore to the west
  3. Slightly Reducing Nickalin and glasshouse
2. And adding a new area to the southern aspect f the sunshine coast - with our new and future inhabitants

But honestly - this whole division with middle of streets is crazy and you might as well go BOLD with future changes as the Mexicans and large devlopment companies like stocklads are making condescend and mini cities to the south of us and is fact not fiction and will not go north of maroocydore river.

attached sketch dipped in tar roughly indicating such.

but honestly can we have boundaries where possible based on actual physical boundary things please and not some theirist magical line in the middle of the road (apart from decent artierial roads like motor ways, highways)

Thanks and enjoy your morning cup of coffee whilst pondering this and keeping the traditional queensland attitude alive like the world ends south of cardwell bridge. or they cant surf south of maroocydore river - they are all life savers on that side of the river !

NICKLIN  
(-0.46%)

NINDERRY  
(9.58%)

MAROOCHYDORE  
(-3.26%)

BUDERIM
