Submission Topic: Electorate Boundaries
Electoral District: Condamine; Lockyer; Toowoomba North;
Toowoomba South

Submission:

The proposed maintaining of the divisions of Toowoomba North, Toowoomba South, Condamine and Lockyer serve to reinforce barriers between the rural and urban communities of these regions, negatively impacting the reach and resources available to the rural population, isolating the urban regions and artificially skewing the demographics of the region. I find the Toowoomba North zoning particularly egregious as it creates an isolated bubble with a high percentage of wealthy voters who have no involvement in primary production, artificially dividing them from both the agricultural regions to their immediate west and the more diverse urban population to their south. The maintenance of this stagnant division that creates a lack of true electoral representation of the region is concerning, and I ask that further consideration be given to the zoning of these electorates.
