You don't often get email from [REDACTED] [Learn why this is important](#)

To who it may concern,

I found your way of listing the submissions purposefully difficult. Why not mainly put the submissions in the electoral areas that way it would take minimal time to find the ones I am most interested in reading and possibly commenting on.

The Callide redistribution is my main concern as I live on the coastal fringe of the Burnett region currently. I read as many submission as I possibly could find relating to my immediate area and each and every one was basically saying the same thing. The best one and most well constructed was from the Baffle Creek Boat Club. Their points covered everyone else's and are valid and important to everyone from the Burnett region who are ridiculously moved into Callide. We have no connection to Callide nor do we wish to because our daily lives revolve around the coastal fringe.

A commonsense approach needs to take place not one to suit the pollies. Even though I know deep down this is not real consultation I still want my voice heard. If community consultation was valued people would have been out into the community and not hiding behind in this approach.

Please accept this as my comments in relation to the submissions presented online.

Warm Regards

Gail Smith
