Submission:

As am a business and employer in the Hill district I am opposed to any boundaries/district changes to the Hill district ad it is growing very quickly. A reduction of regional representation in a region that is growing fast and one of the most productive areas in North Queensland, would be very short sighted indeed.

It would further skew the representation to the detriment of the regional districts where there is already weighted representation in the favor of the city/S East districts.

Further complicating the regional representation is the fact that in many places the population is spread over a large area making it more time consuming for Parliamentary Representatives to stay in touch with their electorate.

I hereby implore you not to make changes to these expanding regions and thus disadvantaging our residents.
