Dear Sir/s, In relation to proposed electrate changes, I'm against this as that would give us less representation here in North Queensland while giving more to the south east corner. As most of Queenslands income comes from north of the Tropic of Capricorn I feel we should have more representatives in parliament than we have, not less. We only have a few elected reps to cover a vast area so we need more divisions not less which also puts the aboriginal communities at a disadvantage by having less say in Government. Thank you.
