**Submission Topic:** Electorate Boundaries  
**Electoral District:** All

**Submission:**

The new combinations of unrelated communities only harms the focus of districts, many with largely differing needs and problems now lumped together, will have a district pulling in conflicting directions to an extreme. And many of the new lines are grouping communities which are separated by natural borders, such as rivers and the like. Perhaps the lines could use some readjusting, but not like this, the new proposal is in many places, nonsensical at best and actively harmful at worst.
