## **Redland City LGA State Electorate Comments**

### **(Submissions S-024, S-025, S-026, S-027, S-028, S-029, S-031, S-104, S-110, S-112)**

Please find attached my comments on the submission **S-024, S-025, S-026, S-027, S-028, S-029, S-031, S-104, S-110, S-112** made in relation to the State electoral districts which relate to the Redland City Local Government Area. I support the breadth of submissions made which articulate clear and logical support for the Redland Local Government Area to be best encompassed within three state electorates. Where there are clear communities of interests, which come with being in the same LGA, such as local shopping facilities, local by-laws, similar local economies. As well as other considerations such as the main shopping districts for these communities being contained within the LGA, and local school catchments being within the LGA boundaries as well.

Most of the submissions express a logical shift of voters between the Redland State electorates of Capalaba, Oodgeroo/Cleveland & Redlands and the consolidation of Springwood and Macalister as Logan based seats, aside from the proposal made in **S-112** which would all see all electorates cross multiple LGA's into Brisbane and Logan and follow minimal communities of interests. With the most illogical part of the proposal being that the rural communities of Gumdale and Belmont which have little association with the Redland LGA be combined with communities in Capalaba or Alexandra Hills. This would generate similar angst as has been caused by having Sheldon and Mount Cotton in the Logan based seat of Springwood, and would see the seat of Capalaba have no centre of gravity around either a Brisbane or Redland City community.

The key critique with the **S-110** submission is that while it resolves historical issues by having Mount Cotton returned to the Redlands State electorate, it then generates a similar problem as with the 2017 Springwood electorate by proposing the inclusion of Carbrook and parts of Cornubia into Redlands which only constitutes roughly 1,200 voters with stagnate forecast growth. And is also community that has no common community of interest with Redlands. As with the inclusion of Mount Cotton into a proposed Redlands electorate it is possible to have the electorate rest well within the LGA and the projected population quota's without the inclusion of the Carbrook and Cornubia suburbs. It would be more logical to have these suburbs in a possible Springwood or Macalister Logan LGA centred electorate as they reside in the Logan LGA, have different school catchments to the schools in Redlands, have different shopping hubs and are far away from the population centres in the proposed Redlands seat, being Victoria Point, Redland Bay and Mount Cotton.

Otherwise, the proposed changes in **S-110** which relate to the Redland, Capalaba and Oodgeroo electoral districts which would see portions of Thornlands shift from the electorate of Redlands into Oodgeroo, parts of Sheldon and Birkdale shift to the electorate of Capalaba and the Mount Cotton area return to the Redlands electorate from Springwood. Are logical and justified as:

- Parts of Thornlands already fall within the Oodgeroo electorate and shifting further parts of this suburb would help relieve the significant quota deficiency currently seen within the district whilst also alleviating the over-quota Redlands district.

- Parts of Birkdale and Sheldon already fall within the Capalaba electorate and shifting further parts of these suburbs would ensure the seat remains within ideal quota.
- The suburb of Mount Cotton falls within the Redland City Local Government Area and would draw value from having a representative based within the same LGA. This shift would also somewhat balance the loss of quota from losing elements of Thornlands from the district.

### **Additional Suggestions**

Further, I believe there is greater opportunity for changes in addition to those proposed by the submission S-110 which would create greater long-term stability in the current and projected quota for the three Redland City LGA seats with minimal impact to economic, social and community of interest factors.

#### **CAPABALA**

- Capalaba is in need of further quota to keep it within a balanced quota position across the long term. The addition of the remaining areas of Birkdale would bolster quota whilst also bringing the entire suburb under one electoral district.
- There has also been a historic trend of redistributing parts of Southern Wellington Point into the Capalaba electoral district. I believe this should continue with the addition of the Spurs Drive Estate.
- SA1 codes: 30101100324, 30101100602, 30101100619 & 30101100620. This estate has a shared economic and community interest with the Capalaba electoral district, as the closest shopping precinct (Horizon at Wellington Point) is within the Capalaba electorate.

#### **OODGEROO**

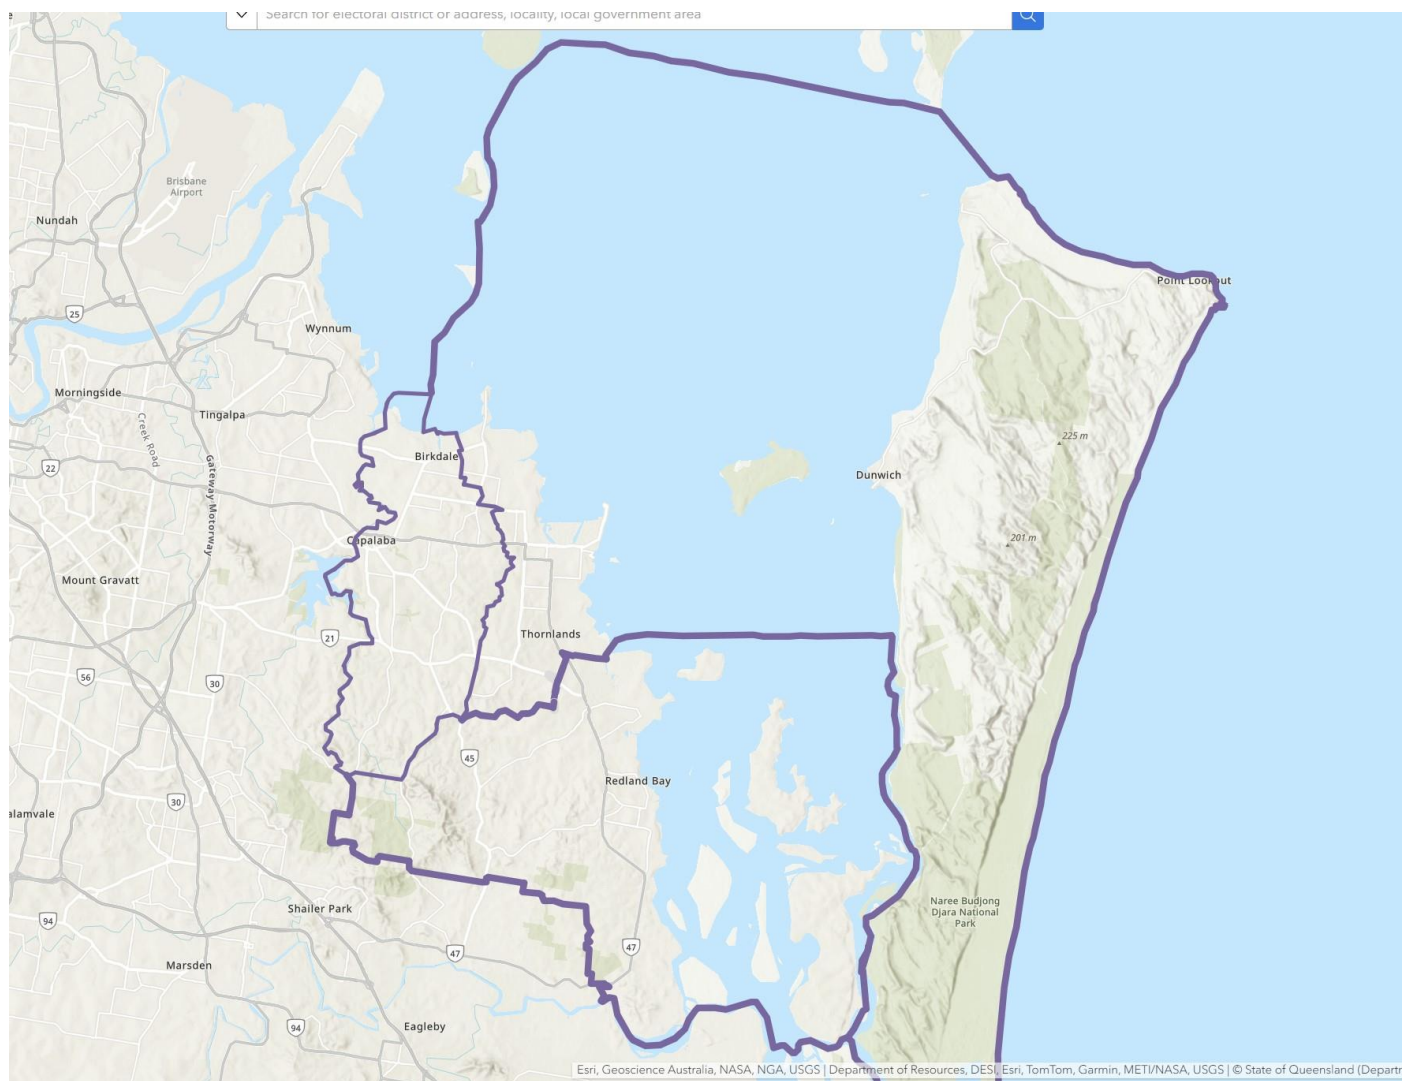

- Oodgeroo is also in need of further quota to keep it within a balanced quota position across the long term. This could be achieved by including additional elements of Thornlands within the electorate, including the Southern Thornlands PDA, Carmel College School Campus and adjacent estates.
- These parts of Thornlands have greater shared economic and social factors with the Oodgeroo electorate as school catchments are shared with the Cleveland State High School.
- The addition of the Southern Thornlands PDA within the Oodgeroo electorate will contribute towards balancing the long-term quota and offsets the shifts away from the district to Capalaba in the Northern parts of the electorate. *(I note the projected growth from the Southern Thornlands PDA is currently not included in the ECQ's projected numbers for Thornlands, as the Data being used by the ECQ is from a data set determined prior to the PDA declaration earlier in 2025)*

#### **REDLANDS**

- Redlands needs to further reduce quota to keep it within a balanced quota position across the short and long term. As outlined above, this could be achieved by redistributing further parts of Thornlands, including the Southern Thornlands PDA to Oodgeroo.
- A small part of Thornlands will remain in the Redlands electorate under this change. There is a shared economic and social factor that would justify this, as the closest community and shopping precinct for these estates (Victoria Point and Lakeside Shopping Centre) falls within the Redlands electorate.

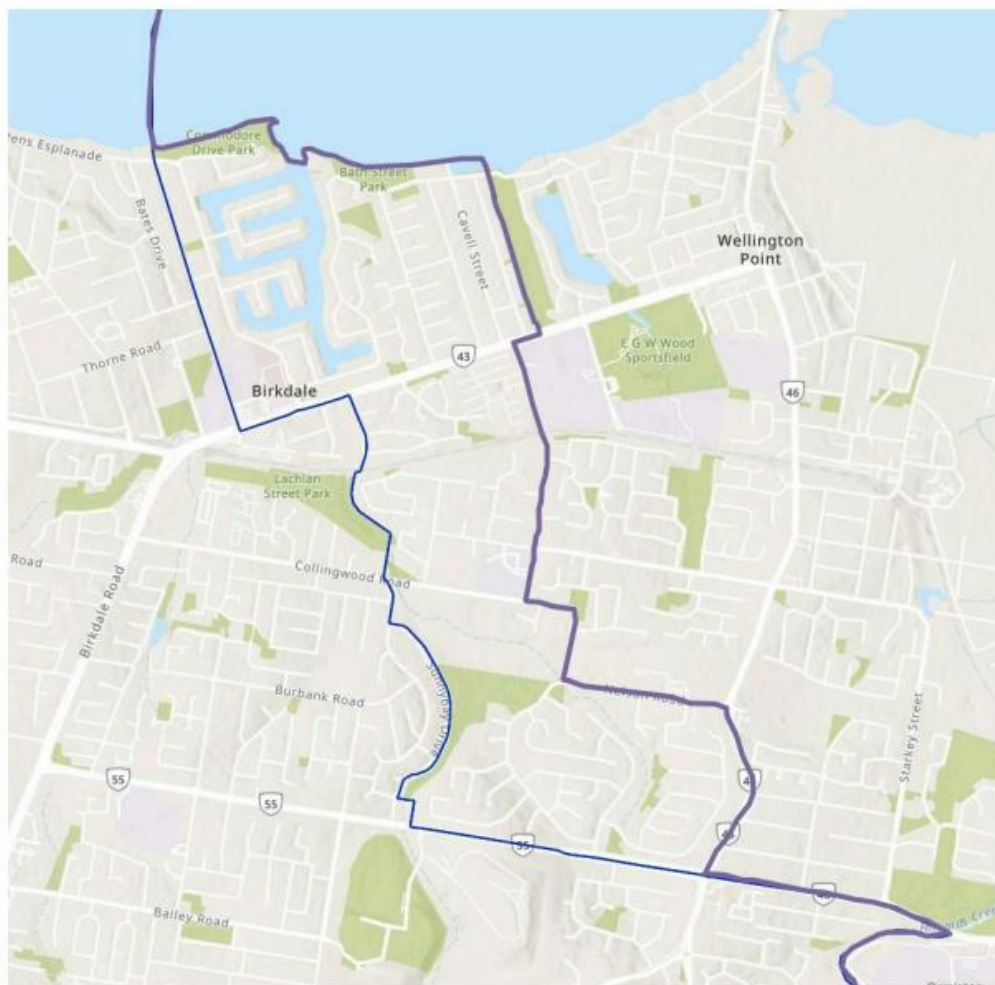

# Alternative Proposed Redland City LGA State

## Electorates Map: Capalaba, Oodgeroo & Redlands

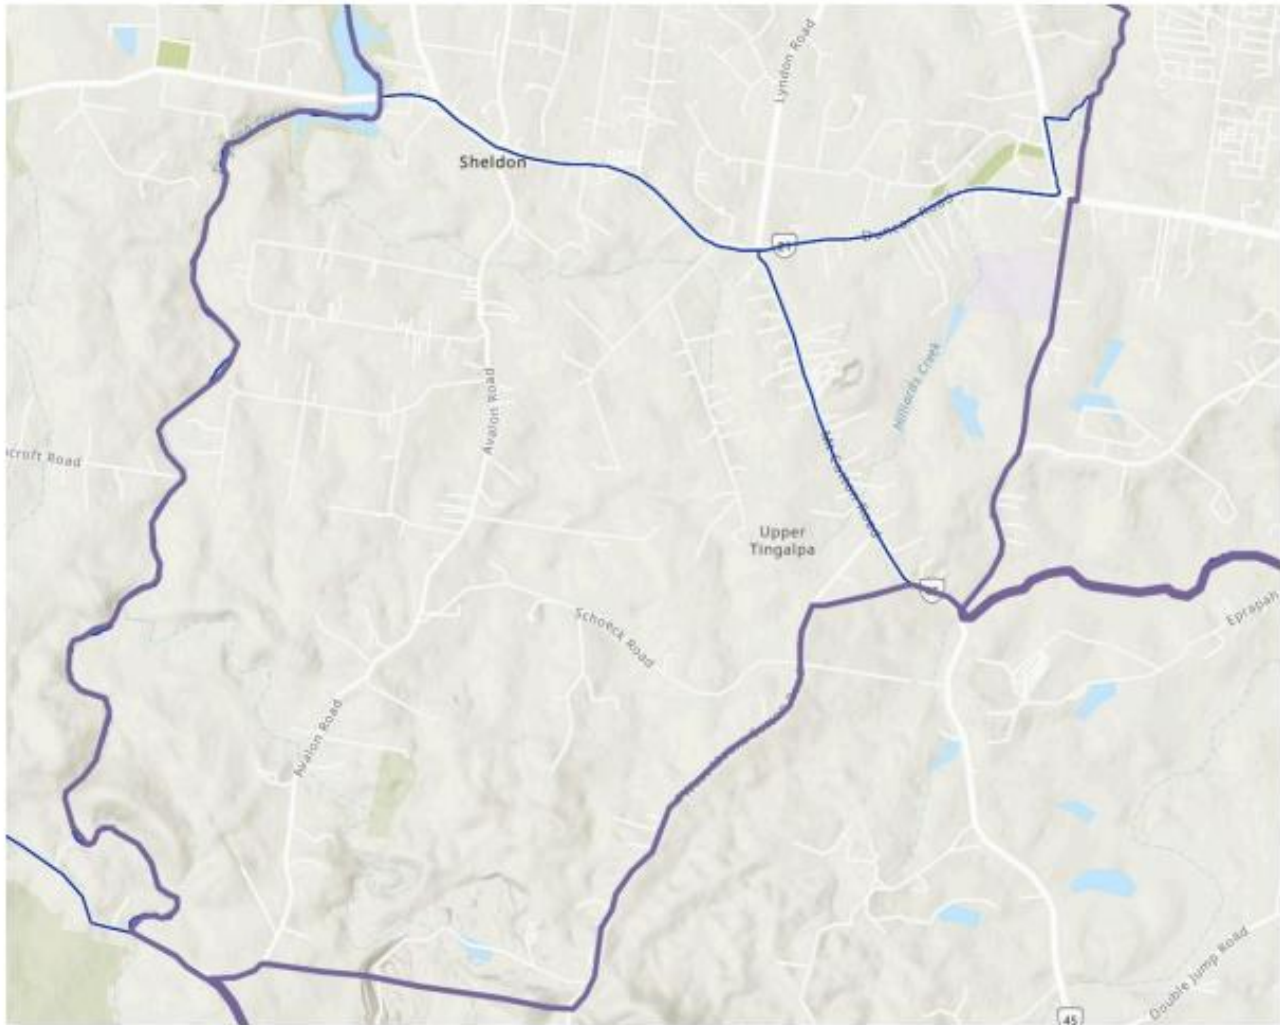

| Submission | Electorate | Projected 2028 | Projected 2032 |  | Suggestion | Electorate | Projected 2028 | Projected 2032 |
|------------|------------|----------------|----------------|--|------------|------------|----------------|----------------|
| S110       | Capalaba   | 2.5% over      | 7.31% under    |  | NEW        | Capalaba   | 8.05% over     | 1.71% under    |
| S110       | Oodgeroo   | 2.45% under    | 5.36% Under    |  | NEW        | Oodgeroo   | 2.56% Under    | 5.25% Under    |
| S110       | Redlands   | 9.34% over     | 6.97% over     |  | NEW        | Redlands   | 2.22% Over     | 0.12% Over     |

Inclusions into Capalaba Electorate (Wellington Point & Birkdale parts from Oodgeroo)

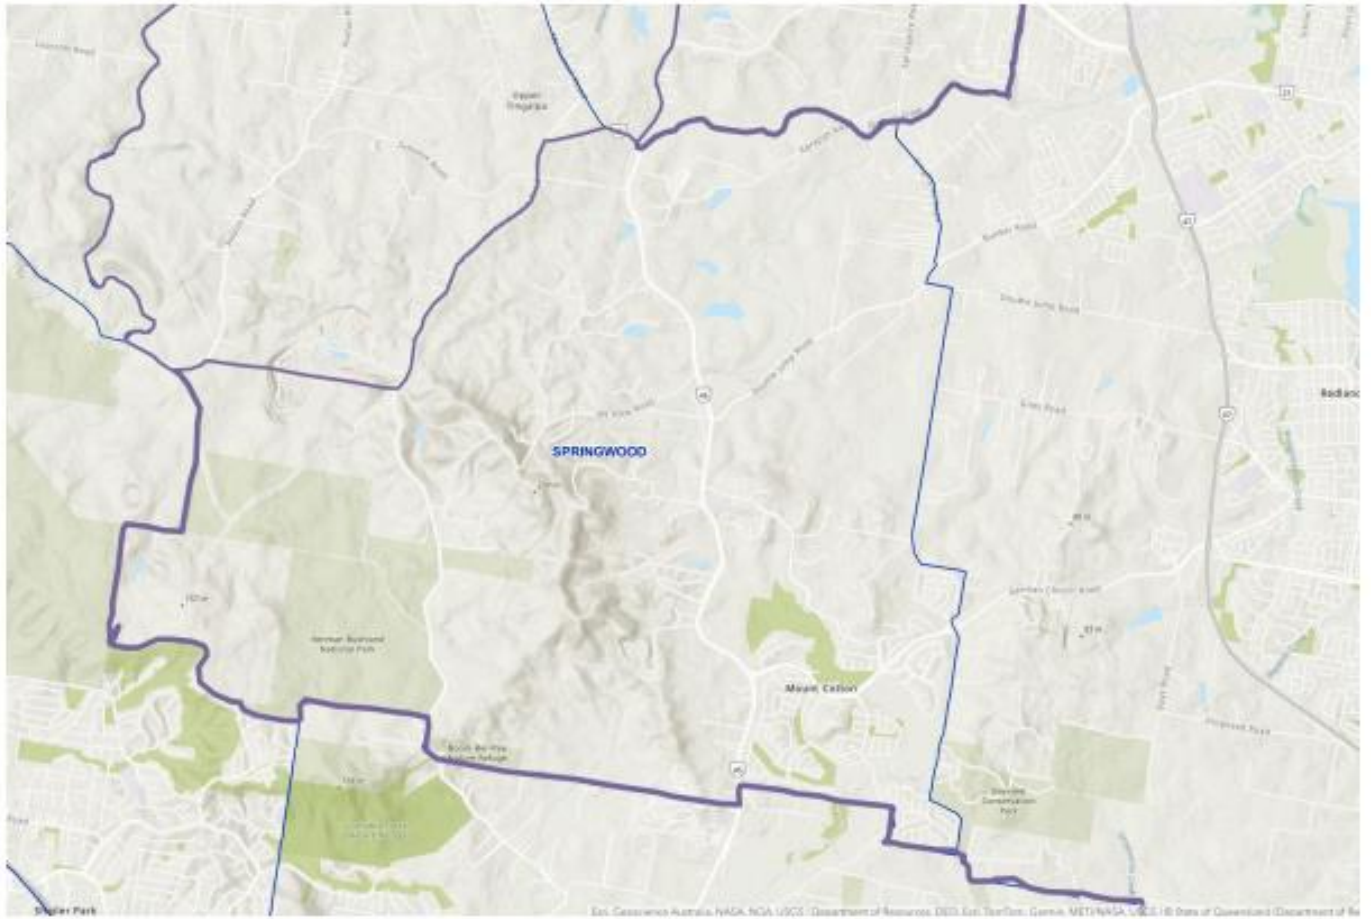

Inclusions into Capalaba (Sheldon Suburb from Mount Cotton & Redlands)

Inclusions into Oodgeroo Electorate (Parts of Thornlands from Redlands)

## Inclusions into Redlands (Mount Cotton from Springwood)

| Submission | Electorate      | Projected 2028 | Projected 2032 |
|------------|-----------------|----------------|----------------|
